GET READY FOR THE 2011 SPORTS RACER SERIES...

With the CAMS release of Group 6 SR technical regulations, ASRA has now finalised the calendar and sporting regulations for the most exciting new category in Australian Motor Sport 2011

The 2011 CAMS Australian Sports Racer Series will launch at the Australian Sports Car Carnival 28 - 29 May, Eastern Creek. This will be the first race of its type in Australia which is dedicated to sports cars powered by superbike engines from Group 6 SR & Group 2C, with most of the cars purpose designed and built for the very successful USA SCCA DSR & CSR Sports Racer categories.

In this years series expect to see the super quick centre seated sports cars from West, Speads, Minetti & Stohr along with the more conventional sports cars from ADR & Radical. Already registered for this years series we have the brutal Hayabusa powered Minetti, Speads, Lincspeed, and West WX10 race cars in Class 2 plus the very quick Suzuki and

Kawasaki powered Stohr, West WR and Lincspeed 1 litre cars in Class 1.

At the May Sports Car Carnival we will have a diverse field of cars with all of the drivers aiming to set the official track records for the 2 Sports Racer classes.

The highlight of the season will be the Phillip Island Round held with the Australian GT Series. At this event Sports Racer's have over 2 hours of track time including 3 x 1/2 hour races.

About Sports Racer Series

The Australian Sports Racer Series (ASRS) is the most exciting new category in Australian motorsport. It is also one of the most cost effective categories! On a "bang for buck" basis no other category comes close. With car kits starting at less than \$40k and turnkey cars at \$75k the barrier to entry is low. Couple this with

Aaron Steer wins 2010 Sports Car Carnival, Eastern Creek in WX10

20 GROUP 6SR SPORTS RACERS IN AU AND MORE ON THE WAY!

the performance metrics and it is obvious what the attraction is.

With lap times of 1:30 flat at Eastern Creek and Phillip Island, 56 Seconds at Wakefield Park there are few race cars that come close to the performance levels of these cars.

The Sports Racers are arguably the sexiest looking cars on the track too. The Le Mans styling and aerodynamics deliver handling second to none and looks that turn heads. The 13,000 rpm 1 litre cars and throaty 10,000 rpm 1.3 litre cars sound awesome and add to both the driving and spectator experience.

Add the reliability factor of the production superbike engine and low cost to replace or rebuild the entire engine and gearbox and the attraction is clear. A new Hayabusa engine and gearbox is around the \$6500 mark and will deliver on average two full seasons of reliable racing. A complete engine rebuild is under \$3000, an incredible \$1500 per year in amortised engine costs.

A race budget of \$6,000 per annum is not unrealistic, the only variable being race slicks which will cost you between \$500 - \$750 per meeting (average 2 - 3 meetings per set).

Get Involved Today

Minetti and West both offer arrive and drive packages at very reasonable pricing

and include transport and track staff.

Minetti, Speads and West offer turnkey race cars or starter kits for the home enthusiast to build a Group 6 SR car to their own quality and options specifications. See contact details below.

Calendar

ROUND	TRACK	DATE
1	Eastern Creek	May 27/28/29
2	Morgan Park	June 24/25/26
3	Phillip Island	September 2/3/4
4	Wakefield Park	November 18/19/20

The Cars

Minetti Sports Cars:

The Minetti SS-V1 (pictured below) is the most versatile Sports Racer currently available and can be supplied as a basic starter kit through to a complete rolling chassis and can be fitted with a wide range of late model superbike engines
